Decision of  **FFSA**
Fédération Française du Sport Automobile

ROTAX 125 Micro MAX will become the official engine for the French Mini Kart category

Dear distributor,

We just have received the information from Sodikart/France that the French Karting Federation FFSA has decided that the ROTAX 125 Micro MAX engine will become the official engine of the French Mini Kart category for at least 3 years starting as of 2012.

The quality standards of the ROTAX MAX engine family, the high durability and the sound "evolution concept" of the ROTAX MAX engine family have been contributing for sure on the positive decision of the FFSA.

We also want to congratulate Sodikart for this achievement and we are convinced that the decision of the French Federation FFSA will also have a positive impact on the further international growth of the 125 Micro MAX category.

Best regards,

BRP-Powertrain GmbH & Co KG
